

Non Contact Web Cleaner

BR 32/52

Improved Quality

– With The World's Most Used Web Cleaner Head

- Available for web widths up to 5500mm
- Effective 3-chamber solution
- No dust traps due to end covers
- In and outfeed rollers as option for materials with low tension

BR32/52 is the new upgraded version of the classic Kelva web cleaning head with integrated active anti-static bars for improved cleaning efficiency as an option.

BR32/52 cleans both sides of the web simultaneously.

For best possible performance, use in combination with Kelva AF24 automatic filter.
