FOCUSING ON YOUR PROCESS

KELVA[®]

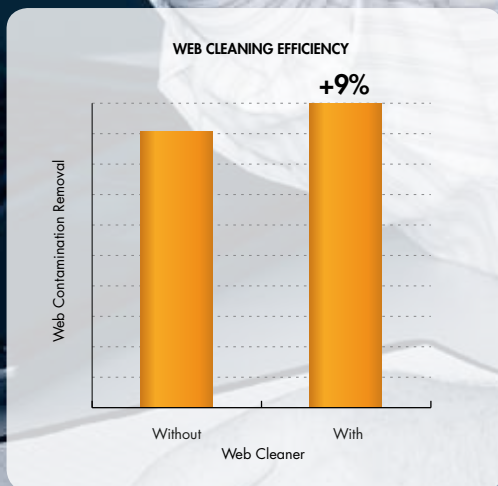

Reduction in Waste

Less Surface Contamination

– Using web cleaning systems produces a marked improvement in the visual quality of key products. The most significant benefit of using web cleaners is a considerable reduction in defects caused by surface contamination.

– Kelva web cleaning systems remove contamination from the web leaving a clean surface for coating; contamination on the web surface causes pinholes, streaks, indents and many other defects. A clean web, it just makes sense.

Kevin McKell
Technical Sales Manager
Kelva UK

“Kelva helps us improve the visual quality of our products”

– Exopack Advanced Coatings is a global leader in the development, manufacture and distribution of precision coated papers, films and speciality substrates for imaging, electronics, medical and optical technologies. We also offer unique Speciality Films and Coating Services. Non-contact web cleaners from Kelva are a great help in improving the visual quality of our products.

Chris Reed
Operations Director
Exopack Advanced Coatings

Exopack Advanced Coatings is a Global leader in the development, manufacture and distribution of precision-coated papers, films and speciality substrates for imaging, electronics, medical and optical technologies.

World Wide Web Cleaning

Customer Needs – Top Priority

-  Highest quality
