

PAPER

FOCUSING ON YOUR PROCESS

“There’s no single device that has provided such an increase in productivity”

– When we found that printing blanket washing operations took a full five percent of total operating time, we decided to install web cleaning systems. After having listened carefully to the people on the printing line, and having thoroughly examined web cleaning systems on the market, Kelva

web cleaning system supplied by Gadelius Printing Industry, was finally installed. There’s no single device that has provided such an increase in productivity.

Takeshi Uetake – Director and Plant Manager

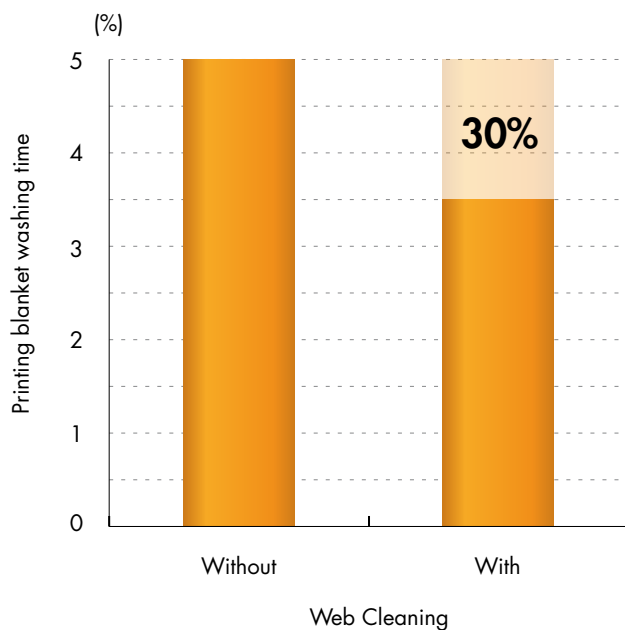

Iwaoka Corporation

A Clean Sheet

Printing Blanket Washing Times Was Cut By **30%**

In August 2004, the first Kelva web cleaner was installed on one of Iwaoka's two A length offset presses. Over the first month, the data collected clearly showed that printing blanket washing times had been cut by 30%. Because paper dust doesn't accumulate and washing of the edges is no longer needed, blankets can be used for much longer.

– Printing quality has also been improved, as the removal of dust has greatly reduced printing flaws. And while water drainage tanks previously needed weekly cleaning to remove paper dust sludge, no cleaning has been necessary since the introduction of the Kelva web cleaners, concludes Mr Uetake.

World Wide Web Cleaning

Customer Needs – Top Priority

-  Highest quality
-  Individual Solutions
-  Increased Productivity
-  Less Contamination
-  Healthier Working Environment

Kelva supplies products to guarantee a safe and reliable production. Our unique web cleaning systems for the graphic industry are distributed to customers all over the world. Working together with us, you will get a reliable partner with unique competence and experience. Always with your needs as our top priority.

Kelva is a member of the Swiss company group Prografica AG, a strong and well-known supplier to the graphic arts industry in central Europe.

Prografica also forms a strategically important part in our global network of distributors.
